Education Mentor - Mindhub Coding Schools

Baia Mare | Education / Training / Arts | Education / Training

As an Education Mentor, I guided and supported students in their learning journey, fostering a collaborative and engaging environment. I leveraged my expertise in coding and pedagogical strategies to help students develop essential technical skills and critical thinking. My role involved designing curriculum materials, providing personalized feedback, and encouraging a growth mindset to empower learners in achieving their goals.

date acquired May 2023

Database Programming with SQL - Oracle Academy

date acquired May 2021

Database Design - Oracle Academy

date acquired Dec 2020

Projects

Fatigue Monitoring Application - FocusKeeper

period Nov 2023 - May 2024

In this project, which utilizes Python and Artificial Intelligence to monitor and optimize the user's concentration and energy levels during work sessions, I contributed to defining the functional and non-functional requirements of the application, designed the architecture and user interface, and wrote code for the key functionalities.
